

# BFS GasOil Ultra

Improve agricultural vehicle performance and efficiency  
with revolutionary high quality fuel

Fuel Services

Using BFS GasOil Ultra will help your agricultural equipment run more smoothly and efficiently. GasOil Ultra contains a unique additive that has been scientifically proven to improve significantly engine power output, markedly reduce polluting exhaust emissions and completely eliminate water contamination in stored fuel.

We prepare BFS GasOil Ultra by passing standard EN590 gas oil through a fine filtration unit which dramatically reduces the solid micro-particle content. Fewer suspended particles in the fuel reduce injector/injector pump wear and fuel filter blockages so saving on maintenance costs and minimising vehicle down time – especially important at harvest.

## Key benefits of BFS GasOil Ultra\*

- Increases engine power output per litre of fuel for greater efficiency
- Eliminates water contamination and prevents fuel bug growth in stored fuel
- Reduces injector and injector pump wear to reduce maintenance costs
- Reduces fuel filter blockages to minimise down time and cut maintenance costs
- Dramatically reduces polluting exhaust emissions
- Our supply chain is very secure and reliable.

## BFS for fast, efficient and friendly fuel delivery

Together with our sister company, BFS Fertiliser Services, we understand the needs of the farming community. Our drivers will deliver BFS GasOil Ultra or standard gas oil for agricultural vehicles, kerosene for driers or derv for farm vehicles promptly and safely.

Our friendly drivers have essential local knowledge and have been delivering fuel efficiently and securely, even in farmers' absence, for more than half a century. Please ring us on 01245 425251 to see if we deliver into your area.

\*Storage tanks must be clean and free from any residual contamination to gain the benefits of the ultra-filtration.
